

HIGHLANDS RANCH COMMUNITY ASSOCIATION

VIDEO ANTENNA/DISH INSTALLATION HIGHLANDS RANCH ARCHITECTURAL COMMITTEE

Name: _____ Date: _____

Property Address: _____

Mailing Address (if different): _____

Home telephone: _____ Work or cell phone _____

Description of antenna including type and size: _____

What is the approximate height to the unit from ground level? _____

What is the color of the unit and the color of your house? _____

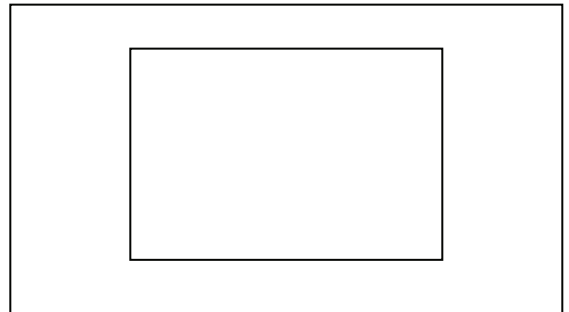

All antennas/dishes shall be installed with emphasis on being as unobtrusive as possible to other homes. To the extent that reception is not substantially degraded or costs for installation unreasonably increased, all antennas/dishes shall be screened from view from any street and nearby lots to the maximum extent possible, and placement shall be made in the following order of preference:

- a. Inside the structure of the house, not visible from the street.
- b. Location in back yard or side yard behind and below fence line; not attached to the fence.
- c. Backyard or side yard mounted on house, in the least visible location below roofline.
- d. Side yard in front of wing fence, screened by and integrated into landscaping.
- e. Front yard screened by and integrated into landscaping.
- f. Back rooftop.

If more than one location on the property allows for adequate reception, the order of preference described above shall be used and the least visible site shall be selected. Dishes shall not encroach on any common areas or be attached to fencing.

Please indicate the following on the diagram at the right:

- Proposed or current location of the unit.
- Landscaping or fencing that will visually "screen" the unit.

I hereby attest that all positions and locations described above have been tried in order of rank and that the site of installation is the first site whereby an acceptable quality signal can be received.
